

## Windows 10 UWP – Hands on Lab

### Lab 6:

**Note:** This demo app created for this lab uses the Visual Studio 2015 RTM and Windows Tools SDK ver 10240.

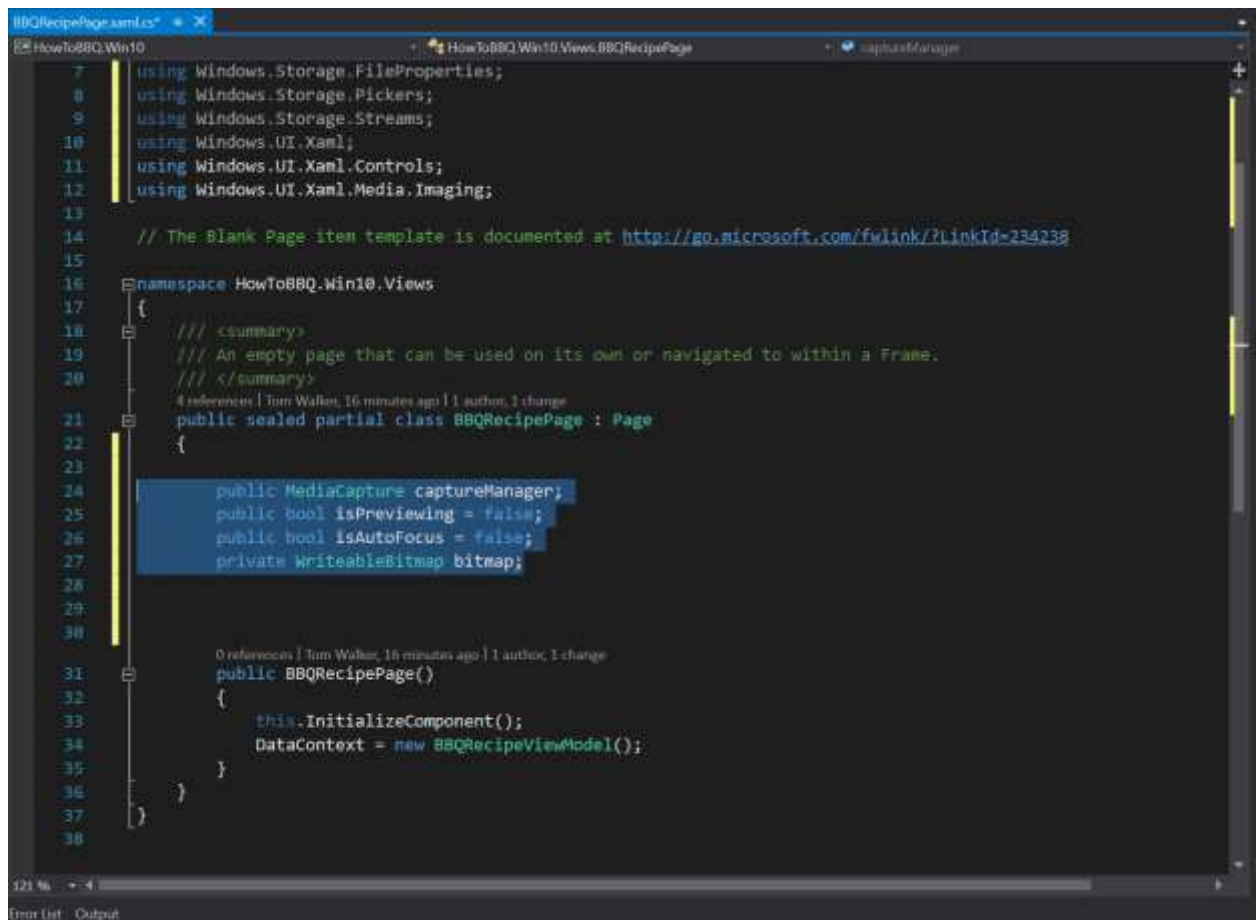

1. Open the \View\BBQRecipePage.xaml.cs file and make sure the following using statements match the ones below. Add the missing using statements.

```
using HowToBBQ.Win10.ViewModels;
using System;
using System.Collections.Generic;
using Windows.Foundation;
using Windows.Media.Capture;
using Windows.Storage;
using Windows.Storage.FileProperties;
using Windows.Storage.Pickers;
using Windows.Storage.Streams;
using Windows.UI.Xaml;
using Windows.UI.Xaml.Controls;
using Windows.UI.Xaml.Media.Imaging;
```

2. In the \View\BBQRecipePage.xaml.cs file and add the following lines of code on line 24.

```
public MediaCapture captureManager;  
public bool isPreviewing = false;  
public bool isAutoFocus = false;  
private WriteableBitmap bitmap;
```

The screenshot shows the Visual Studio IDE with the file BBQRecipePage.xaml.cs open. The code is as follows:

```
7 using Windows.Storage.FileProperties;  
8 using Windows.Storage.Pickers;  
9 using Windows.Storage.Streams;  
10 using Windows.UI.Xaml;  
11 using Windows.UI.Xaml.Controls;  
12 using Windows.UI.Xaml.Media.Imaging;  
13  
14 // The Blank Page item template is documented at http://go.microsoft.com/fwlink/?LinkId=234238  
15  
16 namespace HowToBBQ.Win10.Views  
17 {  
18     /// <summary>  
19     /// An empty page that can be used on its own or navigated to within a Frame.  
20     /// </summary>  
21     4 references | Tim Walker, 16 minutes ago | 1 author, 1 change  
22     public sealed partial class BBQRecipePage : Page  
23     {  
24         public MediaCapture captureManager;  
25         public bool isPreviewing = false;  
26         public bool isAutoFocus = false;  
27         private WriteableBitmap bitmap;  
28  
29  
30  
31     0 references | Tim Walker, 16 minutes ago | 1 author, 1 change  
32     public BBQRecipePage()  
33     {  
34         this.InitializeComponent();  
35         DataContext = new BBQRecipeViewModel();  
36     }  
37 }  
38
```

The code on lines 24-27 is highlighted in blue, indicating it has been added or is the focus of the instruction.

3. In the \View\BBQRecipePage.xaml.cs file and add the following lines of code on line 37.

```
private async void Loadphoto(string filename)
{
    //load saved image
    StorageFolder pictureLibrary = KnownFolders.SavedPictures;

    StorageFile savedPicture = await pictureLibrary.GetFileAsync(filename);
    ImageProperties imgProp = await
    savedPicture.Properties.GetImagePropertiesAsync();
    var savedPictureStream = await savedPicture.OpenAsync(FileAccessMode.Read);

    //set image properties and show the taken photo
    bitmap = new WriteableBitmap((int)imgProp.Width, (int)imgProp.Height);
    await bitmap.SetSourceAsync(savedPictureStream);
    BBQImage.Source = bitmap;
    BBQImage.Visibility = Visibility.Visible;
}

private async void ButtonFilePick_Click(object sender, RoutedEventArgs e)
{
    var picker = new FileOpenPicker();
    picker.ViewMode = PickerViewMode.Thumbnail;
    picker.SuggestedStartLocation = PickerLocationId.PicturesLibrary;
    picker.FileTypeFilter.Add(".jpg");
    picker.FileTypeFilter.Add(".jpeg");
    picker.FileTypeFilter.Add(".png");

    StorageFile file = await picker.PickSingleFileAsync();

    if (file != null)
    {
        // Application now has read/write access to the picked file
        Loadphoto(file.Path);
    }
}
```

```
BBQRecipePage.xaml.cs
HowToBBQ.Win10
HowToBBQ.Win10.Views.BBQRecipePage
ButtonFilePick_Click(object sender, RoutedEventArgs e)

30
31 public BBQRecipePage()
32 {
33     this.InitializeComponent();
34     DataContext = new BBQRecipeViewModel();
35 }
36
37 1 reference | 0 changes | 0 authors, 0 changes
38 private async void Loadphoto(string filename)
39 {
40     //load saved image
41     StorageFolder pictureLibrary = KnownFolders.SavedPictures;
42
43     StorageFile savedPicture = await pictureLibrary.GetFileAsync(filename);
44     ImageProperties imgProp = await savedPicture.Properties.GetImagePropertiesAsync();
45     var savedPictureStream = await savedPicture.OpenAsync(FileAccessMode.Read);
46
47     //set image properties and show the taken photo
48     bitmap = new WriteableBitmap((int)imgProp.Width, (int)imgProp.Height);
49     await bitmap.SetSourceAsync(savedPictureStream);
50     BBQImage.Source = bitmap;
51     BBQImage.Visibility = Visibility.Visible;
52 }
53
54 0 references | 0 changes | 0 authors, 0 changes
55 private async void ButtonFilePick_Click(object sender, RoutedEventArgs e)
56 {
57     var picker = new FileOpenPicker();
58     picker.ViewMode = PickerViewMode.Thumbnail;
59     picker.SuggestedStartLocation = PickerLocationId.PicturesLibrary;
60     picker.FileTypeFilter.Add(".jpg");
61     picker.FileTypeFilter.Add(".jpeg");
62     picker.FileTypeFilter.Add(".png");
63 }
```

4. In the \View\BBQRecipePage.xaml.cs file and add the following lines of code on line 37.

```
private async void ButtonCamera_Click(object sender, RoutedEventArgs e)
{
    CameraCaptureUI captureUI = new CameraCaptureUI();
    captureUI.PhotoSettings.Format = CameraCaptureUIPhotoFormat.Jpeg;
    captureUI.PhotoSettings.CroppedSizeInPixels = new Size(600, 600);

    StorageFile photo = await
        captureUI.CaptureFileAsync(CameraCaptureUIMode.Photo);
    if (photo != null)
    {
        BitmapImage bmp = new BitmapImage();
        IRandomAccessStream stream = await photo.
            OpenAsync(FileAccessMode.Read);

        bmp.SetSource(stream);
        BBQImage.Source = bmp;

        FileSavePicker savePicker = new FileSavePicker();
        savePicker.FileTypeChoices.Add
            ("jpeg image", new List<string>() { ".jpeg"

});

        savePicker.SuggestedFileName = "New picture";

        StorageFile savedFile = await savePicker.PickSaveFileAsync();

        if (savedFile != null)
        {
            await photo.MoveAndReplaceAsync(savedFile);
        }
    }
}
```

```
68         Loadphoto(file.Path);
69     }
70 }
71
72 // references: 0 changes, 0 authors, 0 changes
73 private async void ButtonCamera_Click(object sender, RoutedEventArgs e)
74 {
75     CameraCaptureUI captureUI = new CameraCaptureUI();
76     captureUI.PhotoSettings.Format = CameraCaptureUIPhotoFormat.Jpeg;
77     captureUI.PhotoSettings.CroppedSizeInPixels = new Size(600, 600);
78
79     StorageFile photo = await captureUI.CaptureFileAsync(CameraCaptureUIMode.Photo);
80
81     if (photo != null)
82     {
83         BitmapImage bmp = new BitmapImage();
84         IRandomAccessStream stream = await photo.OpenAsync(FileAccessMode.Read);
85         bmp.SetSource(stream);
86         BBQImage.Source = bmp;
87
88         FileSavePicker savePicker = new FileSavePicker();
89         savePicker.FileTypeChoices.Add("jpeg image", new List<string>() { ".jpeg" });
90
91         savePicker.SuggestedFileName = "New picture";
92
93         StorageFile savedFile = await savePicker.PickSaveFileAsync();
94
95         if (savedFile != null)
96         {
97             await photo.MoveAndReplaceAsync(savedFile);
98         }
99     }
100 }
101 }
```

5. Open the \View\BBQRecipePage.xaml file and add the following lines of xaml code on line 63.

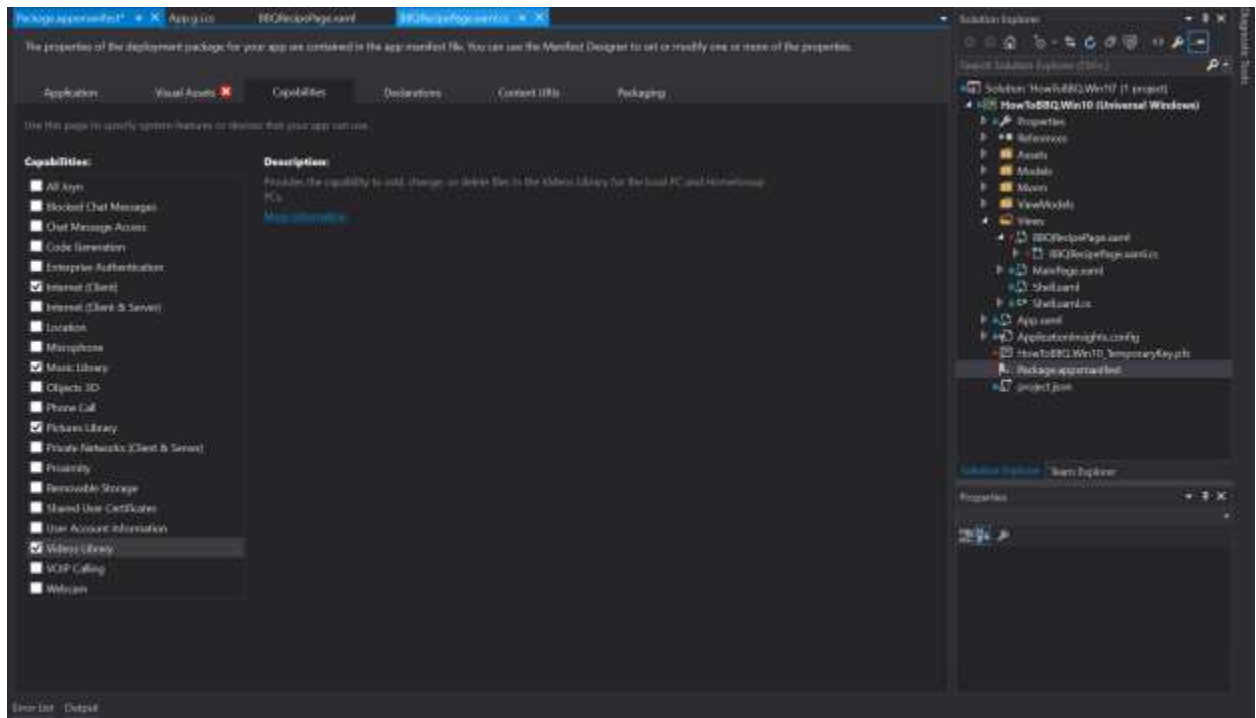

```
<StackPanel Margin="0,20,0,0" Orientation="Horizontal"
HorizontalAlignment="Center">
  <Button Margin="10" x:Name="ButtonFilePick" Content="Select Image"
FontSize="32" Click="ButtonFilePick_Click">
    <Button.Background>
      <LinearGradientBrush EndPoint="0.5,1"
        StartPoint="0.5,0">
        <GradientStop Color="#FFDC9743" Offset="0.171"/>
        <GradientStop Color="#FF0A0A0A"/>
        <GradientStop Color="#FF0A0A0A" Offset="0.98"/>
        <GradientStop Color="#FFDC9743" Offset="0.949"/>
      </LinearGradientBrush>
    </Button.Background>
  </Button>
  <Button Margin="10" x:Name="ButtonCamera" Content="Camera"
FontSize="32" Click="ButtonCamera_Click">
    <Button.Background>
      <LinearGradientBrush EndPoint="0.5,1"
        StartPoint="0.5,0">
        <GradientStop Color="#FF4293CE" Offset="0.171"/>
        <GradientStop Color="#FF0A0A0A"/>
        <GradientStop Color="#FF0A0A0A" Offset="0.98"/>
        <GradientStop Color="#FF4293CE" Offset="0.949"/>
      </LinearGradientBrush>
    </Button.Background>
  </Button>
</StackPanel>
```

6. Double click on the file “Package.appxmanifest” to open the App Manifest widow. Make sure to enable “Video Library”, “Picture Library”.

- 7.
